

## **Risk Management**

### **Name**

Changes to the Blizzard API  
Compatibility problems between each Project  
SimulationCraft API changes  
Little time because of exams  
Conflicts  
We need more time for our project as expected  
API Key not sufficient

### **Description**

Major API changes to the blizzard API  
We have split GottMuslg into 3 Projects  
Major API changes to SimulationCraft  
We dont finish until July  
Team conflicts about next features  
A similar project is released before we can release ours  
We have 6000 requests per hour

Probability	Impact	Factor
unknown	very high	25 %
unlikely	very high	25 %
unlikely	very high	20 %
likely	low	10 %
medium	high	10 %
low	medium	5 %
low	very high	5 %

**Mitigation**

Subscribing to the RSS feed, to get updates on API changes

Integration Tests

read developer updates on the website

Distribute work, prioritize work

PM has the last word

First release with less features

create several accounts for backup
